

KOPkit®

KEEP-ON-PUMPING KIT - ECO GEARCHEM®

KOPkit® (Keep-On-Pumping kits) Saves You Money and Time

Pulsafeeder has built a reputation for superior reliability by manufacturing carefully-engineered, high-quality equipment. Even the best equipment, however, requires a minimal amount of preventative maintenance, and can be subject to wear due to external system processes. Our kits are designed to guard against unnecessary downtime and provide the highest level of efficient and uninterrupted service from all of our pumps. Keeping a KOPkit® on your shelf assures that you will always have the necessary parts available to get you up and running in minutes, not days.

Typical kits include:

- Drive and idler shaft and gear assemblies
- Wear plates
- Bearings
- Drive shaft seal, packing ring or mechanical bearing lock pins
- Static O-rings
- Installation instructions or drawing

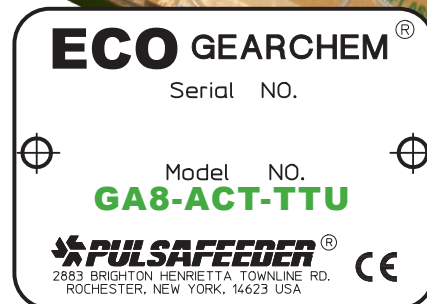

Benefits:

- Save money when buying parts in a kit
- Reduce maintenance costs
- Extend the life of your pump with routine installation
- Increase operating efficiency
- Cut downtime from days to minutes

Ordering a KOPkit

Whether for a new or existing pump, ordering a KOPkit is easy. The Model Number is stamped on every pump's name plate. Add a "K" before the first letter and remove the hyphens to create your KOPkit number.

Contact your Pulsafeeder Representative today to order.

Typical KOPkit® Number
